DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

Claims 1-10 distinguish over the prior art of record and thus are allowed.

The closest prior art is U.S. Patent No. 6,718,872 which teaches to drive the sheet feeding section and the sheet refeeding means at a preselected timing, respectively. With respect to claim 1, the overall combination structure of a duplex printer of the type as claimed including particularly the means for effecting position adjustment on each of the first and second print images with respect to each of the first and second sheets in a sheet conveyance direction, with position adjustment on the first print image being effected by changing a sheet feeding timing of the sheet feeding section and position adjustment on the second print image being effected by changing a refeeding timing of the refeeding means, is not taught by the prior art of record. With respect to claim 10, the overall combination structure of a duplex printer of the type as claimed including particularly a first timing adjuster for changing the sheet feeding timing of the sheet feeding section to permit position adjustment on the first print image and a second timing adjuster for changing the refeeding timing of the refeeding means to permit position adjustment on the second print image is not taught by the prior art of record. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
